MOGA 1.0

**Hands-on Cadaveric Training
& Workshop on Osteotomy**

Ramaiah Advanced Learning Centre, Bengaluru

27 - 28 February, 2026

www.tcmc.co.in

LEARNING OBJECTIVES

Osteotomy around the knee is rapidly evolving and reclaiming its rightful place in modern orthopaedics. With improved techniques and a strong focus on joint preservation, mastering osteotomy is no longer optional - it is essential.

This intensive 2-day workshop is designed to simplify osteotomy, remove uncertainties, and empower surgeons with clarity and confidence.

WHY THIS COURSE

Understand the evolution of knee osteotomy and its growing relevance today

Learn when, why, and how to perform osteotomy effectively

Gain confidence through structured teaching and hands-on cadaveric training

COURSE HIGHLIGHTS

Classroom-based learning with clear, concept-driven teaching

Indications made simple - know when to do osteotomy and when not to

Step-by-step planning for accurate and reproducible correction

Extensive hands-on cadaveric workshop with expert guidance

Cover the following surgical procedures in the form of live demonstrations, and hands on practise
Medial Opening HTO | Medial Closing DFO | TTO
Approach to lateral DFO | Approach to lateral closing HTO
Slope Correction Osteotomy (Demonstration Only)

PREREQUISITES

Basic knowledge of osteotomy surgery.

Limited number of delegates for focused learning.

First 24 delegates get complete exposure to all aspects of osteotomy learning.

OUR MISSION

To remove doubts and confusion around osteotomy, make it simple, logical, and reproducible - and ensure every participant leaves confident and empowered.

MAKE OSTEOTOMY GREAT AGAIN
